

GO - Epitech JAM

G-JAM-001

Epitech Jam

Parallel

Epitech Jam

PRESENTATION

The main goal of this jam is for you to have **FUN!!**

Find an idea matching with the given theme, create a group and develop your project in only one week-end!

CONSTRAINTS

For this Jam you will have to respect the following constraints:

- You must accomplish at least **two** of the listed challenges

The respect of the constraints is mandatory to validate the unit.

CHALLENGES

Challenges are meant to bring a bit of fun, curiosity and push you to go further in some aspects of your project.

For this JAM, here's the available challenges:

- Create an animation on the parallels of the globe
- The project integrate an optical illusion
- During the keynote, make a mathematical demonstration that 2 lines are parallel
- The project integrate an experienced skier
- Use a picture of your campus in a relevant way

The completion of those challenges are not mandatory but will be taken into consideration during the evaluation.

EVALUATION

The evaluation of your work will be done during a keynote. You must participate to the keynote in order to be able to validate the unit.

The keynote will evaluate those points:

- The quality of your presentation and support (include a demo of your project!)
- How many challenges you managed to complete
- Originality of the idea
 - The idea **must** have a relation with the theme, but that does mean you can't be creative about it.

Have fun while working for the duration of the jam and there'll be no problem for the validation ;).
